October 22, 2025

To Whom It May Concern,

This letter is to confirm that Suraj Yadav presented on behalf of the Ag and Bio Engineering Department at Mississippi State University at the Data Science Academic Insight event on March 1, 2025.

The presentation, titled "Deep Learning Model for Crop Yield Prediction via Time-Series Adaptive Semantic Segmentation on UAS-based Spatio-Spectral Fusion Data", was part of the concentration spotlight portion of this event that allowed students to see how faculty and staff at MSU are using data science skills in different disciplines.

We appreciate Suraj Yadav's contribution to the success of this event.

Sincerely,

Lynn Taylor
Academic Coordinator
Data Science Academic Institute
Mississippi State University
